NIDRS INCIDENT REPORT

Alert ID : 999

Attack Type : Live Anomaly

Severity : Critical

Source IP : 192.168.1.50

Destination IP : 10.0.0.99

Protocol : TCP

Packet Count : 842

Total Bytes : 1204800

Status : New

Response :

Detected At : 2026-11-03 09:56:01

MITRE ATT&CK Mapping

Technique : T1046 / TA0043 — Anomalous Behaviour (Unmapped)

Tactic : Reconnaissance / Unspecified

Detected by the unsupervised Isolation Forest model based on statistical deviation from normal traffic, not a labeled signature — so it cannot be mapped to one exact MITRE technique. Flagged here as unusual behaviour warranting manual triage.
